Service-driven supply chain automation

ToolsGroup is a leading provider of cloud-based, service-driven supply chain automation solutions for retailers, distributors, and manufacturers. We serve the planning needs of many of the world's most recognized brands including Harley Davidson, P&G, Absolut, and Aston Martin. Our solutions help companies to meet their service-level commitments to their customers while minimizing inventory and improving planner productivity through automation.

toolsgroup.com

+ Allocation & Replenishment

Ensures the right amount of stock is at the right place, at the right time using service-level targets, inventory policies and near real-time customer demand signals.

+ Demand Planning & Sensing

Automates the optimization of demand plans using self-learning algorithms and incorporates detailed short-term demand data reducing forecast error to optimally deploy inventory.

+ Demand & Supply Collaboration

Complements demand forecasting by bringing together data from multiple stakeholders to improve overall consensus forecast accuracy.

+ Production Planning

Supports the definition of demand-driven production and procurement plans across approaches including make-to-stock, make-to-order and assemble-to-order.

+ Promotions Planning

Improves promotions using machine learning to recognize shared promotional event characteristics and identifying their impact on sales.

+ S&OP

Provides the ability to make informed strategic and tactical decisions - balancing supply and demand - and implement those decisions into daily execution.

+ Supply Planning & MEIO

Enables management of the entire supply network as a single pool of inventory ensuring desired customer service levels are met with minimum network inventory.

Why ToolsGroup?

While others focus on forecast accuracy, ToolsGroup focuses on the ultimate goal – service-level delivery. With ToolsGroup's SO99+, you can set your service-level targets and relax in the confidence that they'll be met with the minimum possible inventory investment.
